

## **We take responsibility!**

### **Office:**

- Waste reduction (avoid bottled water, bring lunches in reusable containers, take paperless notes, reuse old equipment)
- Recycling garbage (separate organics, sort garbage)
- Printing reduction (use both sides of the paper when printing, copying, and writing, reuse one-sided misprints for plain paper faxes or scratch paper)
- Biking to work

### **Events:**

- Programs regarding sustainability (suggest to clients sustainability as main subject for their event, include at least one green activity to conferences and meetings, create team buildings with sustainable theme or purpose)
  - Technical visits and speeches from relevant professional speakers within the field (update our portfolio of sites and speakers in the field of sustainability)
  - Always including bike or green transportation means (electric boats and busses, but also Nordic walking, running, canoe, kayak etc)
  - Choosing hotels with a green policy
  - Choosing restaurants that offer organic and local food
  - Choosing suppliers inhabiting positive environmental habits
- Reusing material for the events (while being also Covid-friendly!)

*or is it?*
